

This Z-Wave thermostat is an electronic thermostat for installation in a standard wall box. The thermostat has a built-in Z-Wave 500 chip that can be connected with home automation systems such as Fibaro, Sensio, Vera, Zipato.

The display shows the floor or ambient temperature. The thermostat is equipped with a touch-sensitive buttons. By lightly pressing the buttons, the display will show the set value. The Z-Wave thermostat is equipped with a single-pole switch. It can be used with two external temperature sensors.

Delivery

MAGNUM Z-Wave thermostat does not come standard with the MAGNUM underfloor heating kits.

Order procedure: Choose a separate MAGNUM Mat, MAGNUM Cable or MAGNUM Foil in the correct size and add to this the Z-Wave thermostat.

What is Z-Wave?

Z-Wave is the name of a wireless signal to control devices in your house called domotics (home automation). Briefly allows you to program your home (e.g. : when the thermostat turns on / off). And operate it all remotely through your tablet or smartphone.

Compatible systems

MAGNUM Z-Wave thermostat works with systems like Fibaro, Vera, Zipato and Sensio.

Technical details

- Space and floor sensor
- Temperature limiter
- Built-in Z-Wave chip 500 series
- Week program through gateway
- Can be used in combination with NTC-sensors
- 8 scenarios
- Works with Fibaro, Sensio, Vera and Zipato systems.
- Suitable for: Gira, Jung, Elko, Merten, Busch Jager etc.

Technical data

Voltage: 230 Volt - 50/60 Hz
Max. load: 16A / 230V
Temperature: + 5 / + 40 Å C
Protection: class IP21
Colour: Polar white (RAL 9003)
CE: inspection

Warranty

2 year warranty on the electrical operation and floor sensor.
